Profile Summary

Junior Front-End Developer with a strong foundation in HTML, CSS and JavaScript, focused on building responsive, accessible user interfaces and turning design ideas into working products. I have delivered small web projects using semantic HTML, modern CSS (Flexbox, responsive layouts) and JavaScript for interactive behaviour, and I actively use Git and GitHub to manage my work. I am curious about how AI can support the development process and have built a custom GPT assistant to help generate exercises, explain concepts and improve my own code.

Technical Skills

- **Markup & styling:** HTML5, CSS3, responsive layouts, Flexbox, basic Grid, media queries, basic animations.
- **Front-end:** JavaScript (ES6 fundamentals, DOM manipulation, interactive UI behaviour for menus, forms and galleries).
- **Design & UX:** Wireframing and layout (Moqups), basic Figma familiarity, semantic HTML, accessibility-aware design (headings, landmarks, contrast, keyboard focus), mobile-first thinking.
- **Tools & workflow:** VS Code, Git, GitHub, browser DevTools, basic npm usage.
- **Ways of working:** Agile principles, iterative development, incorporating feedback, collaborating with non-technical stakeholders.
- **AI in development:** Configuring custom GPT assistants to support learning, documentation and problem-solving in JavaScript and web development.

Projects

Custom GPT Study Assistant

- Configured a custom GPT-based assistant to generate JavaScript coding exercises, explain concepts and suggest learning resources, supporting my continuous learning.
- Designed structured prompt workflows to break complex problems into smaller tasks, mirroring how I plan features and debug issues in real projects.

Wildlife Photography Website

- Built a responsive, multi-page website using HTML5 and CSS3 (Flexbox, media queries) to showcase wildlife photography across mobile, tablet and desktop.
- Implemented JavaScript enhancements for navigation and image gallery behaviour (e.g. lightbox or image switching) to improve engagement and usability.
- Tested layouts and performance across devices and browsers using DevTools, optimising image sizes and structure for faster loading.

Baskit - Shopping List Project <https://baskit-shopping.netlify.app/>

- Developed a responsive **shopping list web application** using HTML, CSS, and JavaScript, implementing product categories, search, promotional sliders, product details, and basket functionality.

- Applied **modular JavaScript and software engineering principles**, including DOM manipulation, event handling, client-side state management, localStorage persistence, routing/navigation, reusable functions, and defensive programming.
- Deployed and tested the application as a **public production website using Netlify**, while using Git and GitHub as part of the project's version-control and development workflow.

Work experience

Private Hire Driver, Public Transportation

May 2015 – Present

- Provide safe, reliable transport while maintaining a professional, customer-focused service in high-pressure situations.
- Plan and adapt routes in real time to meet time constraints and changing conditions.
- Maintain safety, cleanliness and basic vehicle checks to ensure consistent service quality.

Site Manager, Industrial demolition & recycling

September 2012 – January 2015

- Led on-site operations, coordinating teams to deliver projects on time and within budget.
- Ensured compliance with client specifications, health and safety regulations and environmental standards.
- Recruited and managed staff, handled resource planning and resolved daily operational issues.

Tallyman Clerk, Harbour operation

March 2000 – August 2012

- Monitored shipment accuracy and compliance, recording logistical data with handheld systems.
- Maintained detailed load documentation and performed quality checks to prevent errors.
- Collaborated with warehouse and transport teams to resolve discrepancies quickly.

Education

- | | |
|---|---------------|
| • Level 3 Software Development – Havant and South Downs College, UK | February 2025 |
| • Bridging Course – University of Chichester, UK | June 2024 |
| • Level 2 Functional Skills English – City of Portsmouth College, UK | June 2022 |
| • GCSE Mathematics – Highbury College, Portsmouth, UK | June 2019 |
| • BSc International Economics Relations – Ovidius University, Romania | June 2009 |
| • Computer Technician – Youth Progress Association, Romania | August 1999 |

Professional Development & Interests

- Passionate about software development, regularly working on personal projects to enhance my technical skills.
- Continuously expanding my knowledge by completing interactive coding courses, exploring various programming languages and technologies.

Additional Information

- Open to relocation for the right role and willing to be based within commuting distance
- Full UK driving licence and access to a personal vehicle, enabling reliable daily commuting.
